TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, C++, HTML, CSS
Frontend: React, Vite, Tailwind CSS, TanStack Query, Leaflet
Backend: Node.js, Express, FastAPI, Spring Boot, REST APIs, WebSockets
Data & Cloud: PostgreSQL, MongoDB, MySQL, AWS S3, Docker, Vercel, Render, Neon, Linux
DevOps & Testing: CI/CD (GitHub Actions), Agile, Jest, Vitest, pytest, Git

PROJECTS

Freightline App | *React, Node/Express, PostgreSQL, MongoDB, AWS S3, WebSockets* freightline-app.vercel.app

- Built a full-stack freight-operations web app with transaction-safe load status changes and role-based access for drivers versus dispatchers.
- Split database workloads for performance — PostgreSQL for reliable transaction processing, MongoDB for high-volume append-only GPS telemetry.
- Implemented live tracking over WebSockets and ensured production reliability with 65 automated tests (46 Jest/Supertest backend, 19 Vitest frontend).

Sentinel Ops Dashboard | *React, TypeScript, FastAPI, PostgreSQL, WebSockets, Docker* sentinel-ops-flame.vercel.app

- Built a CI/CD pipeline with GitHub Actions running a 93-test validation suite against a live database, preventing breaking changes from reaching production.
- Developed a real-time operations console for map-based asset monitoring, enforcing strict incident workflows via finite-state-machine logic.
- Integrated an OpenAI GPT-4o-mini triage assistant behind a swappable provider interface to summarize active incidents, with TTL database caching to reduce API costs.

Algorithm & Backend Projects | *Java, Python, Spring Boot*

- Delivery Route Optimizer: routing simulation for 40 packages across multiple trucks using a custom hash table and nearest-neighbor algorithm with time-constraint logic.
- Travel Booking API: RESTful backend services with Java, Spring Boot, and MySQL managing transactional catalog retrieval and secure checkout.

EXPERIENCE

Freelance Web Developer | *Shoe Express Shoe Repair & EuroCoons Cattery* Overland Park, KS | 2026 – Present

- Shipped a custom six-page SPA with React 18, TypeScript, and Tailwind CSS for a local business (shoexpressrepair.com), implementing per-page SEO with React Helmet and JSON-LD LocalBusiness schema.
- Built a Netlify Forms contact pipeline and an environment-variable-driven Google Maps integration for store hours and routing.
- Performing a full SEO audit and site rebuild for an international Maine Coon cattery, including a 301 redirect map and structured data (in progress).

Manager | *Minsky's Pizza* Lenexa, KS | August 2019 – Present

- Lead shift teams of 10–26 staff serving 350+ customers on high-volume nights, consistently meeting revenue and ticket-time targets.
- Trained and onboarded 30+ new hires across host, server, and kitchen roles, advancing from host to manager over seven years of continuous employment.

EDUCATION

Western Governors University | *Bachelor of Science in Computer Science* Graduated March 2026

- Capstone: Telco Customer Churn ML — end-to-end churn-prediction pipeline (Python, pandas, scikit-learn)
- Certifications: LPI Linux Essentials, ITIL 4 Foundation
- WGU Micro-Credentials: Back-End Development, Java Development, AI Optimization
